

REPUBLIC OF TURKEY
YAŞAR UNIVERSITY
Code of Practice for Internships

- 1- As a principle, students complete their internships in the summer months.
- 2- Students doing internships in the summer months are registered to and assessed in the internship course in the next semester following completion of the internship. Graduation procedures are completed if these students have graduation status (students who need only to complete an internship course in order to graduate).
- 3- Students who can graduate at the end of Fall/Spring semester can register to an internship course along with the other courses (if any) required to be taken and on condition it fits their schedule. In that case, they should deliver all internship-related papers to the directorate of the internship commission no later than 2 business days before the final grade entry date specified in the academic calendar (students who can complete their internship course with other courses taken)
- 4- Students who will have graduation status at the end of the Summer Semester can be registered to an internship course during Summer School if they request it. In that case, all internship-related papers are required to be delivered to the directorate of the internship commission by August 31. Otherwise, students will get the grade “U”. (Students who take internship courses during Summer School)
- 5- A fee equal to 1 ECTS is collected from students who exceed the duration of education (by waiting for next semester) as specified by the Board of Trustees.

Approved by the Rector on: 15.02.2017
